## **Patisserie Veronique.**

### **Data Section:**

This section is divided into 2 parts.

The first part is a list of the Neighbourhoods of Paris and their approximate center given in geographic coordinates (latitude, longitude and elevation). I have acquired the names of the districts in Paris from the webpage <http://www.parisnet.com/parismap.html>, and I have used GoogleMaps to approximate the coordinates of the district center. This data would be used as an input in *forsquare* in order to find the venues within a 500 m radius of the centre of each neighbourhood.

The second part of the data is a breakdown of the venues in Paris (obtained with *Forsquare*) and their respective geographic coordinates. Here each entry also contains information in which neighborhood the venue is located. Finally, I will proceed to investigate the most frequent venues in each district, and based on that information, I will study the best location for the Patisserie. A list of venues for all the districts in Paris on our scope is shown below.
